

Yerassyl Bekberov

Senior Software Engineer

Almaty, Kazakhstan | bekberata@gmail.com | +7 777 651 1765 | <https://www.linkedin.com/in/ye-russell/> | <https://ye-russell.netlify.app/>

Executive Summary

Senior Software Engineer with MSc in Petroleum Geoscience and 5+ years of enterprise engineering experience delivering geospatial, real-time, and data-intensive industrial platforms. Strong expertise in Angular, React, TypeScript, and domain-driven systems within energy and industrial environments.

Core Competencies

Angular, React, TypeScript	Schema-Driven Systems & JSON Models
Enterprise UI Architecture & State Design	Performance Optimization & Accessibility
Real-Time Systems (WebSockets, SSE)	Testing (Jest, Cypress), CI/CD, Docker
Geospatial Visualization (Leaflet, Google Maps API)	Agile, Code Reviews, Pair Programming

Professional Experience

Senior Frontend Engineer — Geological Systems POCs (Jan 2026 – Present)

- Designed interactive geological map platform with layered visualization and CRS-aware workflows.
- Modeled geological entities and metadata structures for scalable frontend systems.
- Developed digitalization pipeline UI for legacy geological report transformation.
- Translated complex subsurface workflows into structured digital interfaces.

Senior Frontend Engineer — B2C Automotive Marketplace (Nov 2025 – Feb 2026)

- Delivered customer-facing features in high-traffic production marketplace.
- Contributed to UI redesign improving usability and conversion flow.
- Integrated analytics tracking and improved listing performance.

Senior Frontend Engineer — EPAM | Baker Hughes (Apr 2025 – Oct 2025)

- Modernized enterprise OnePM industrial platform using Angular 18+.
- Built WebSocket-based collaborative whiteboard.
- Implemented virtualized tables and analytical dashboards.

Frontend Engineer — EPAM | Wolters Kluwer (2022 – 2024)

- Worked 2 years on multi-tenant enterprise CMS platform.
- Built complex form engines, editable tables, validation frameworks and annotation systems.
- Handled large structured JSON schemas and implemented schema-driven UI rendering.
- Increased unit test coverage from 30% to 80%.
- Collaborated in international Agile team.

Frontend Engineer — EPAM | PTTEP (2021 – 2022)

- Developed geospatial dashboards integrating Google Maps API and Chart.js.
- Implemented reusable reactive state management patterns.
- Optimized frontend performance and reduced redundant API calls.

Education

- University of Liverpool — MSc Petroleum Geoscience (2019)
- Satbayev University — BSc Geology & Geophysics (2015)

Certifications

AI Literacy Program — EPAM (2024)	Web Development Bootcamp — London App Brewery
JavaScript/Front-End — Rolling Scopes School	Computer Science — nFactorial School (Gold Certificate)

Languages

English — B2+ | Kazakh, Russian — Native
